About K & M Nursery

For over 13 years K&M Nursery has strived to grow florist quality plants for independent garden centers and nurseries.

- Our customers want the highest quality and that is what we try to deliver.
- We have grown to over 105 acres of production.
- We are adding more varieties of plants every year.
- We understand that to compete in today's marketplace, you need beautiful plants at competitive prices.
- We know you need these plants while sales are hot.
- Another advantage we can offer is to deliver plants on our own fleet of trucks.
- Turnaround time is 4-5 days for orders under 1000 miles.
- Orders over 1000 miles can be delivered within 7-10 days.

About Our Plants

Soil

Our soil is custom blended and contains only the highest quality Canadian Peat. We don't try to cut costs with cheaper mixes.

Fertilizer

All of our plants are grown with 100-180 day time release fertilizer so you won't be running out of it just when the plants arrive. This isn't the case with the quick release 30 day fertilizers that many companies will use.

Liners

We do approximately 90% of our own liners. Since the cost is relatively inexpensive, we put twice as many liners in each container for many of the varieties. This makes for a much fuller plant.

Spacing

All of our plants are given more than adequate spacing. Most of the flowering bushes and trellis have 4 square feet of spacing. The Boston fern hanging baskets have 6 square feet. This allows our plants to grow as big and full as possible.

PALMS

Palms are a hardy and versatile group of handsome evergreens. The lacy fine arching fronds bring tropical splendor to the garden. This selection of locally grown palms consists of the most popular and hardiest for our region. These tropical beauties are container grown for ease of handling, transport and transplanting. Palms require little to no maintenance.
